

Q-SERIES

THE Q-SERIES MAKES YOUR BLENDER THE STRONG, SILENT TYPE

With the development of the Q-Series sound reduction technology, Blendtec™ continues to deliver the same industry leading performance with a reduction of roughly half of the audible sound associated with normal blender operations.

Standard Features

POWER

- Direct drive motor
- Power options

Volts	Amps	Watts
100	13, 18	1300, 1800
120	13, 18	1500, 2000
220 - 240	6.5, 9	1500, 2000

CONTROLS

- No-Tend™ touchpad controls
- 30 pre-programmed blend cycles
- Blue LCD display counts cycles
- Solid state electronics

VORTEX

- Two 64 oz. jars included
- Milkshake blade available on 64 oz. jar
- 96 oz. five-sided jar available

CUSTOMIZE

- Custom jar graphics available
- Program your own blend cycles from your computer

QUIET

- Q Series™ sound enclosure design reduces sound up to 50 percent

MKT-CN-BR-081 Brochure, Q-Series Rev 03 Jan 09

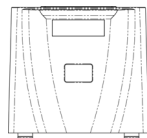

Q-Series Component Overview

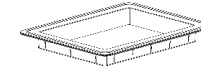

- Sleek sound enclosure with a low profile that incorporates sound reduction technology*

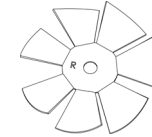

- Jar design reduces the sound associated with jar operations and delivers improved overall performance and durability. New jars come with a one year warranty*

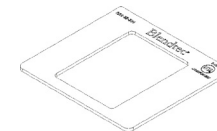

- Motor stand incorporates sound reduction baffles to dampen sound

- Vibration dampening gasket reduces sound generated between blending platform and motor stand

- Breakthrough fan design delivers sound reduction technology while improving motor air flow and cooling capacity

- For in-counter models the gel gasket not only dampens the vibration between the counter and sound enclosure, but also prevents spills from entering the motor area*

- The shape of the stainless steel blending platform dampens sound and drains liquid away from the blender motor

*These Q-Series sound components can be utilized with existing Smoother, SpaceSaver and ABC models. The simple upgrade to Q-Series components does not require special tools, and only takes a few minutes to make the conversion.
